

INVEST IN THE FUTURE

GALAXY 250M C

250 A - 230 V

084858

**High-performance pulsed MIG/
MAG welding wherever you need
it!**

Made in France

DOUBLE PULSED

ModulArc mode reduces heat input to the part by up to 30% to minimize deformation and produce aesthetic beads without spatter.

IMMEDIATE CONTROL

Icon-based user interface, very easy to configure to create high-quality welds easily and every time.

SMART SETTINGS

Over 40 synergies available for effortless welding. Simply select the gas, wire diameter, and material thickness and start welding.

TRACEABILITY OF EACH WELD

Keep a record of each bead, with all welding variables, to provide proof of compliance with manufacturing rules.

COMPACT & PORTABLE GENERATOR

Equipped with handles and shock-absorbing pads, this model is easily transportable and compatible with a recommended 15 kW / 18 kVA generator.
