

Description and Application

This is a rutile flux cored wire which operates with a very stable, spatter free arc producing bright, smooth weld bead surfaces and self releasing slag.

This wire deposits a low carbon weld of about 24%Cr-13%Ni. It is designed for dissimilar welding such as welding stainless steel to mild steel or low alloy steel. The wire is also suitable for the first layer on mild or low alloy steel prior to overlaying with **DW-308L** or **DW-308LP**
